EDUCATION

Bachelor of Information Technology

AMA University Proj. 8, Quezon City | 2016

PROFESSIONAL SUMMARY

IT graduate with hands-on experience developing web applications using Python, Django, PostgreSQL, JavaScript, React, Next.js and Tailwind CSS. Built projects involving authentication, database management, user access controls, CRUD operations, automated testing, responsive interfaces and HTML Canvas game development. Proficient in Git and GitHub, with additional professional experience in logistics, documentation, reporting and operational coordination. Seeking a junior backend or full-stack developer position.

PROFESSIONAL EXPERIENCE

Junior Software Developer | Galinduh

August 2026 - Present

OTP Authenticator

Python · Django · Authentication · Testing

- Implemented email-based one-time password verification with hashed OTP storage and expiration.
- Added cooldowns and attempt limits to control verification requests.
- Used Django sessions to establish authenticated access after successful verification.
- Tested OTP workflows, including expiration, incorrect codes and rate-limiting behavior.

Receiving Clerk | SANFORD MARKETING CORPORATION (Savemore)

Feb 2019 - Aug 2019

- Received and verified incoming deliveries against product and documentation records.
- Monitored damaged, defective and near-expiry inventory.
- Prepared reports on bad orders, near-expiry items and newly received products to support inventory monitoring.

Dispatcher | METROPAC LOGISTICS CORPORATION INC.

Aug 2017 - Mar 2018

- Coordinated delivery and dispatch activities to support daily logistics operations.
- Prepared and processed operational documents, including SAP-related invoicing, delivery documentation and purchase order requests.
- Maintained reports and communicated with relevant teams to support accurate and timely deliveries.

Student Trainee | Assistant Network Administrator, PLDT

Feb 2014 - May 2014

- Assisted in developing and maintaining internal business applications to support daily operations and business processes.
- Created reusable code components and modules to improve development efficiency and maintainability.
- Performed debugging, troubleshooting, and software maintenance to ensure stable and reliable application performance.
- Supported database management, application deployment, and system configuration across development environments.
- Contributed to technical documentation and provided user support to ensure smooth system adoption and operation

SELECTED SOFTWARE PROJECTS

Rango — Tango with Django

Python · Django · SQLite · Bootstrap · AJAX

- Developed a Django web application featuring categories, pages, user accounts and profiles.
- Implemented authentication, session-based features and database-backed content.
- Added AJAX interactions for suggestions, page creation and likes.
- Integrated search functionality and organized application logic across models, views and templates.

Task Management System

Python · Django · PostgreSQL · JavaScript · Chart.js

- **Built task management functionality with Django class-based views and CRUD operations.**
- **Implemented authenticated, user-specific task access and ownership controls.**
- **Developed search, dashboard charts, Kanban views and AJAX-powered drag-and-drop functionality.**
- **Organized tasks using categories, priorities, statuses and due dates..**

Personal Develop Portfolio

Next.js · React · TypeScript · Tailwind CSS · GitHub Pages

- **Developed a responsive portfolio website to present technical skills and software projects.**
- **Implemented a component-based frontend using Next.js and React.**
- **Configured static export and deployment through GitHub Pages and GitHub Actions.**
- **Integrated project information, professional background and contact links.**

Skybound — Canvas Game

Next.js · React · JavaScript · HTML Canvas

- **Built a browser-based arcade game using Canvas rendering and a game loop.**
- **Implemented gravity, flap controls, obstacle generation, collision detection and scoring.**
- **Added progressively increasing difficulty, game states and persistent best-score tracking.**
- **Used React state and refs to separate interface updates from high-frequency game mechanics.**

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL
Backend: Django, Django ORM, Authentication & Session Management
Frontend: React, Next.js, Tailwind CSS, HTML5, CSS3, HTML Canvas
Databases: PostgreSQL, SQLite
Testing & Development: Django Testing, Unit Testing, Debugging, Database Migrations
Tools & Development: Git, GitHub, VS Code, Codex, Cursor
Deployment: Vercel, GitHub Pages
